Mathematics and Statistics
University of Strathclyde,
26 Richmond Street,
Glasgow G1 1XH, Scotland

Current duties and research interests

- Google Scholar h-index 24, 1625 citations (March 2018).
- Research: Mathematical modelling and statistical analysis of systems at the interface of epidemiology, socio-economics and policy. Main current areas of application:
 - Spread and control of tree, plant and animal diseases, including trade;
 - Prediction of outbreaks, social impact and human behaviour during influenza epidemics;
 - Impact of intensification on food security in shrimp and fish production;
 - Control of Norovirus dynamics in shellfish;
 - Delivery of ecosystem services, including pollination and impact of neonicotinoids on bee population.
- Development of stochastic, spatially extended, network- and agent-based models;
- Development of bioeconomic models, including stochastic game theory;
- Design and use of computer games in epidemiology and health protection.
- Parameter estimation for epidemiological data (classical and Bayesian, including particle filtering and MCMC).
- Interaction with policy makers, including design and co-design of decision support systems (Defra/Forestry Commission project).
- Preparation of scientific papers; securing external funding and running project, including supervision of 3 PDRAs; supervision of PhD projects.
- Teaching (ca. 200h contact hours per year): Lectures, tutorials and assessment for mathematical courses across all levels (UG and TPG), including algebra, calculus, advanced calculus, real and complex analysis, probability, statistics and numerical methods. Supervision of honours projects and RPGs. Designing new courses, tutorial and exam questions.
- Administration:

Employment

2018-present: Global Talent Chair in Mathematics, Department of Mathematics and Statistics, University of Strathclyde, Glasgow;

2014-2018: Chair in Mathematics, Computing Sciences and Mathematics, Faculty of Natural Sciences University of Stirling, Stirling; Head of Biological Modelling Research Group (2017-2018); Head of Mathematics and Statistics Group (2008-2017); Deputy Head of Computing Science and Mathematics (2014-2017).

2007-2014: Senior Lecturer (2007-2013) and Reader (2013-2014) in Applied Mathematics, University of Stirling; duties as above; additionally, Research Director for the Department of Computing Science and Mathematics (2009/10).

2005-2007: Lecturer in Mathematical Biology, Department of Plant Sciences and College Lecturer in Mathematics for Natural Sciences, Selwyn College, Cambridge;

2003 (concurrent with below): joint project with Univ. of York, Development of Soil Ecosystem Model for the NERC Soil Biodiversity Thematic Programme (developing models for soil microbial diversity);

2002-2005: Research Associate, Department of Plant Sciences, Cambridge; *A strategic model to evaluate control strategies and disease risk of Rhizoctonia in field vegetables*; DEFRA-funded project (developing models for spread of plant pathogens; risk analysis; parameter estimation);

2000-2002 Research Associate, King's College Research Centre and Dept. Plant Sciences, Cambridge (model development and fitting for plant pathogens, particularly cereal pathogens);

1996-2000 Senior Research Fellow in Mathematical Biology, King's College, Cambridge (model development and fitting for plant pathogens; data analysis and models of plant-climate interactions);

1993-1996 Research Associate, Department of Plant Sciences, University of Cambridge (deterministic and spatial models of plant pathogens and model fitting, particularly soil-born diseases of brassicas);

1992-1993 Visiting Research Fellowship, Department of Zoology, University of Cambridge (models of childhood diseases, particularly measles);

1989-1991 (concurrent with below) Wissenschaftler (Research Associate), Arbeitsgruppe Theoretische Ökologie, Forschungszentrum Jülich, Germany (deterministic and stochastic models in ecology);

1984-1993 Research Assistant, Institute of Physics, Jagiellonian University, Kraków (deterministic and stochastic models in physical systems). 1989-1991 and 1992-1993 on secondments, as above.

Education

1984-1989 PhD, Jagiellonian University, Kraków, Poland;
1979-1984 MSc, Jagiellonian University, Kraków, Poland;
1975-1979 Secondary school, A-levels with distinction.

Awards and grants

Ongoing:

2018-2020 Centre of Expertise in Plant Health (Scottish Government, total £600k yearly over 5+ years, Co-I; Stirling component £100k pa);

2016-2021 *Disease management options: Insights from comparing forestry and agriculture* (Scottish Government Strategic Research Programme, £300k; PI of the HEI component);

2017-2019 *The epidemiology of novel PdRI resistant grapevines: epidemic and vector movement models to support integrated disease management* (USDA, led by Univ. of California at Berkeley, cooperator);

2017-2018 'AgriFood at York' funded project on *Biosecurity and food security: The role of Private-Public Partnerships and Assurance Schemes* (£14k, CoI);

Finished:

2016-2017 Defra ITT FEE/0365 *Developing a Plant Health Outbreak Decision Support Framework* (£120k, CoI);

2014-2017 *Modelling economic impact and strategies to increase resilience against tree disease outbreaks* (BBSRC, £1.1m, PI);

2014-2017 *Risks of Animal and Plant Infectious Diseases Through Trade* (NSF-BBSRC, USD1.5m USA component, £600k UK component, Co-I).

2016 BSPP summer student project, collaboration with Scientific Advice for Scottish Agriculture, £2500;

2013, 2014, 2015, 2016 NERC Graduate Course in Modelling for Environmental Science (£30k, CoI);

2014-2015 *Gamification: scoping the use of games to engage and learn* (DEFRA; £4k, CoI);

2013-2017 CASE studentship (CEFAS/University of Stirling) on *An epidemiological and economic framework for designing and evaluating control strategies for water- and food-borne pathogens: A Norovirus case study*. (£50k, PI)

2011 Department for International Development grant on *Characterising livestock system "zoonoses hotspots"* (£19k; PI)

2010 Medical Research Council Catalyst grant, *EPISYSTEM: Designing biological, social and economic environments to enhance resistance to zoonotic outbreaks* (£50k, PI) (selected for the second stage; ultimately unsuccessful)

2010 European Investment Bank grant, *Designing Markets for Ecosystem Services Delivery* (€300k, Co-I)

2009 IMA and BSPP travel grants (total £800)

2008 Leverhulme Trust, *Integrative Ecology* (CoI, selected for the second stage as the only application from Scotland; ultimately unsuccessful).

2003 NERC Soil Biodiversity Programme, travel (overseas) grant;

2003 STOCHDYN - *Stochastic Dynamics: fundamentals and applications*, ESF project, as a part of the European consortium.

2002 British Council/KBN British-Polish Young Scientist Research Collaboration Programme, travel grant for a PhD student, jointly with Jagiellonian University, Poland, *Plant and animal disease on lattices and networks – dissemination and prevention*;

1999 British Council/KBN British-Polish Joint Research Collaboration Programme, travel grant jointly with Jagiellonian University, Poland, *Spatial and temporal heterogeneities in nonlinear models of biological systems*;

1997 BBSRC/EPSRC 3-year grant *Scaling up from individual to population behaviour in stochastic, spatially-extended systems* as a second principal investigator;

1997 BBSRC 3 years PhD studentship *Analysis and prediction of nonlinear dynamics in biological control of plant pathogens*, as a second supervisor and a joint applicant; PhD awarded in 2001;

1990 Polish Ministry for Higher Education prize for scientific research;

1987, 1988 Jagiellonian University internal prize for scientific research;

1984 MSc with distinction;

1979-1983 (every year) Jagiellonian University prize for an outstanding student;

Pending as of March 2018:

2019-2022 *Brexit and pollination* (CoI, BBSRC).

2018-2021 *Plant biosecurity implications of changes in trade* (PhD, Defra, deadline October 2018, in prep.).

Planned as of March 2018:

2018-2021 *Bioeconomic modelling of potato diseases* (PhD, James Hutton Institute/AHDB, deadline October 2018, in prep.);

PhD supervision

Currently one student as second supervisor (students finished in 2016 and 2017); application pending for funding for 2 students from 2018. 3 students as first supervisor (Stirling) and 3 students as second supervisor fully engaged with research (Cambridge), all successfully finished. Internal and external PhD Examiner (Edinburgh, York, Sussex, Heriot-Watt, Glasgow);

Teaching

Lectures and practicals: *Stirling:* lectures and tutorials for various mathematical courses across all years of studies, including calculus, advanced calculus, variational calculus, algebra, probability, statistics, numerical methods, stochastic processes; coaching students for an international Mathematical Contest in Modelling; *Cambridge:* Lectures and practicals for Quantitative Biology Part IA; Part IB Plant and Microbial Sciences lectures and practicals; lectures and supervisions in Frontiers in Plant-Microbe Interactions, Part II; Cambridge Infectious Disease Consortium: Graduate course in modelling; College supervisions. *Kraków:* Classes in physics and mathematics for year 1 and 4 physics students;

Project supervisions: Honours projects at Stirling; Part II and Part III Physics projects at Cambridge (with application to biological systems); 11 summer projects with funding from MIT, Carnegie, BSPP and NERC;

Other teaching duties: *Stirling:* Personal Tutor (since introduction in 2014); *Cambridge:* Tutor and Personal Tutor, Selwyn College and King's College (Cambridge); Director of Studies in Mathematics for Natural Sciences Tripos, Selwyn College; interviews of candidates for admission to study physical sciences, computer sciences and biology (King's College, Selwyn College); *Kraków:* Supervisor of a student computer laboratory; computing classes.

Skills and relevant experience

Basic skills and experience: Practical and theoretical knowledge of biology, ecology, soil science, economics, mathematics, statistics and computing; ability to develop and analyse mathematical models of a wide range of biological and socio-economic phenomena; experienced in experimental design and in statistical analysis of experimental data, including classical and Bayesian statistics, time series analysis, spatial statistics and modelling, MCMC and likelihood parameter estimation; excellent knowledge of C, R, Shiny, Mathematica; good knowledge of Python; experience in design and maintenance of (non-profit and scientific) Web pages and internet domain handling. Organiser and co-organiser of eight international conferences (1987-1990, 2003, 2010, 2017); member of an International Scientific Committee, Symposium on Statistical Physics, 2007 and 2017. Participant and invited lecturer at scientific conferences (a list on request).

Internet consultancy: Founder of an internet consultancy, askstatistician.com (online since 2005).

Languages: Polish – mother language; fluent English; conversational German; basic Russian. Experienced English-Polish translator (including simultaneous oral translation).

Professional organisations: Fellow of the Institute for Mathematics and its Applications (from 2010), Fellow of the Royal Statistical Society (from 2006), Member of the Edinburgh Mathematical Society (from 2014), the British Society for Plant Pathology (from 2003) and the British Ecological Society (from 2000);

Other relevant experience: Member of the Plant Health Expert Group, Scottish Government (2014-2015). FP7/HORIZON 2020 expert evaluator (2013, 2014, 2015, 2016): MSCA and RISE. Regular grant (BBSRC, NERC, MRC, ISF) and journal paper reviewer. External examiner, University of Aberdeen (2014-present).

Other interests: Bible and Christianity; history, particularly Central European; classical music; hiking; woodworking, gardening.
