

Tutorials and Computer Classes

- **Tutorials/computer labs will alternate (one week in classroom, next week in computer lab)**
- **You must register for a group through LearnOnline**
- **The first tutorial will be in week 4**
- **First computer class on week 5**
- **Computer sessions will use Excel.**
- **I expect you to have a basic knowledge of Excel (e.g. how to open a spreadsheet, copy/paste columns of data, etc.).**
- **Students who do not feel they have these basic skills should obtain the book: Guy Judge, *Computing Skills for Economists* (published by John Wiley and Sons). Chapter 4 provides a basic introduction to spreadsheet software such as Excel.**
