#### 1. Stabilization of hybrid stochastic differential equations by feedback control based on discrete-time state observations

November 2014

Xuerong Mao | Wei Liu | Liangjian Hu | Qi Luo | Jianqiu Lu

Recently, Mao (2013) discusses the mean-square exponential stabilization of continuous-time hybrid stochastic differential equations by feedback controls based on discrete-time state observations. Mao...

#### 2. Leader-following consensus of multi-agent systems under fixed and switching topologies

March-April 2010

Wei Ni | Daizhan Cheng

The leader-following consensus problem of higher order multi-agent systems is considered. In the system, the dynamics of each agent and the leader is a linear system. The control of each agent using...
